Weight: 34 lbs

It's the details that make our Angled Double Wall Bowls shine. Double-wall construction helps keep your creations at proper serving temperatures and reduces condensation buildup on the outside of the bowls. Look at the bottom and you'll see a pair of indentations that allow each bowl to be tilted for easier access or just to create an attention-grabbing angle. Finally, these bowls are crafted from durable 18/8 stainless steel so you can look forward to using them for years to come.

This extra-large 304 ounce stainless steel angled double wall bowl is a unique presentation solution for restaurants, buffets or catered events. You can tilt the bowl for a more attractive display, or keep it upright for a more traditional look and use. The large capacity of this bowl makes it perfect for serving foods on the buffet line or shareable salads and appetizers to the table. And because the double-wall construction reduces condensation and provides natural insulation, it boasts easy handling and exceptional safety while serving.
