Say it in color. Say it in black and white. Say it with flair – and without smudges – with these Securit Chalk Markers. They're good on chalkboards and any non-porous surface. And they're a great tool for getting the word out to your customers.

White markers are a classic choice on blackboard-like surfaces – and these markers will work on any non-porous surface. Whether you're writing on your windowpane or leaving a sandwich board out, once your writing has dried, it won't smudge in the rain. All you have to do is use a cloth or sponge to wipe away your drawings.

- Polypropylene, Liquid Chalk
- White
- Wipe Ink Clean with Soapy Wet Cloth
- Perfect for Clear & Attractive Signage
