

Utility Tongs

FS911

REPLACEMENT SPRING FOR TONGS

List Price: \$1.40 EA

Pack: 1,800

Cu. Ft.: 0.22

Weight: 16 lbs

Our utility tongs are dependable, versatile tools designed for everyday use in the kitchen. With a durable stainless steel construction and a comfortable grip, they provide effortless control for serving, grilling, or plating. From prep stations to buffets, these professional-grade tongs ensure lasting performance and clean presentation every time.

Quickly and easily swap out the spring on your American Metalcraft utility tongs with this replacement spring. Designed with durability in mind, this spring is constructed of tempered flat steel. Though sturdy, it ensures that your tongs open and close with ease, so you can securely pick up foods both big and small. Rather than buying a whole new set of tongs, this replacement spring is a great cost-saving option. It serves as a replacement for both our Heavy-Weight Utility Tongs (UT707, UT975, UT1200, UT1600) and Extra-Heavy Weight Utility Tongs (HDUT975, HDUT1200, HDUT1600). Use this dishwasher-safe replacement spring at your restaurant, buffet, catered event, bar, cafe, or hotel.
