With our coil-handled egg rings, you will quickly become the hottest breakfast spot in town! Available in two different diameter sizes, these molds create perfectly-round and consistently-sized fried eggs and patties. Your customers will be "egg"static about the quality of their breakfast sandwiches! They are constructed of heavy chrome plating on half round wire and feature a specially-designed angled handle for easy use and lifting. The best part? The ring's 3/8"-high wall prevents leaks, so you will no longer have to worry about food waste, cross-contamination, and labor-intensive messes!

Serve perfectly round eggs in your breakfast sandwiches with this coil-handle egg ring. Constructed of heavy chrome plating on half round wire, this tool is a durable choice for your commercial kitchen. It features a 4"-diameter mold, creating consistently sized fried eggs and patties that fit just right in between English muffins and bagels. It's even great for making silver dollar pancakes! The 3/8"-high wall keeps contents contained, so you will no longer have to worry about eggs running all over your grill. This not only helps prevent cross-contamination for food safety, but also reduces food waste and clean up time. Even better, the integrated coil handle and 3-1/2" overall height keep your hands a safe distance from the hot griddle. The handle also has an angled design for easy use and lifting. Use this versatile tool at your breakfast restaurant, caf??, diner, food truck, or hotel kitchen. Dishwasher safe for easy handling.

- Chrome-Plated
- Silver
- Handwash Only
