The dark side never looked better than on these unique wood boards. The wood is carbonized to give off rich colors and patterns on both sides.

This 19" L x 7" W carbonized bamboo serving peel sets a complementary stage for hors d'oeuvres, bread and cheese boards. What'll complement those even more is this peel's reversible design – pick dark or light brown depending on your presentation. A handle on one end makes transportation easy, and a small hole lets you hang up this peel when it's not in use. The bamboo's natural wood grain gives each piece a one-of-a-kind pattern of warm earth tones. It's the elegance of nature put to good use: making your culinary creations shine. Hand-wash only and wipe down with a damp cloth after use.
